

Proactive Records Management

From the Back Room to the Boardroom

For too long, a lack of corporate retention policies has remained a hidden risk. The rise of eDiscovery collection costs and the risk of regulatory non-compliance are forcing decision makers in the boardroom to take notice—and action. The real return-on-investment for eDiscovery begins with enforceable policies to retrieve, manage and secure vital corporate records.

Legal ISE™—Trinity Technologies records management solution—is fully integrated with EnCase eDiscovery® for full function records management and eDiscovery support. Legal ISE delivers a powerful corporate retention and disposition system with integrated review, classification, and production capabilities built on the EMC Documentum® platform.

Critical information management is no longer an option, it is a mandate.

Get *proactive*. Let Trinity show you how.
