

FACT SHEET

TRINITYCSA FOUNDING PREMISE:

Software and consulting companies Trinity Technologies (Wellesley, MA) and CSA, Construction Systems Associates, (Atlanta, GA), announced on May 29, 2003 a joint venture to form a new company to serve the power, process, semiconductor, and pharmaceuticals industries.

TrinityCSA's products and services are designed to help companies improve their financial performance by reducing outage schedules, rework, and operating costs by consolidating IT systems; integrating engineering and construction information; and capturing plant information for future operational use.

ABOUT CSA: CSA was established in 1976 in Atlanta, Georgia, with a mission to develop and implement integrated facility databases to support the lifecycle activities of complex facilities. The company's first major project was awarded by ERDA, the Energy Research and Development Administration, which later became the Department of Energy. This project set the course for major 3D plant database and modeling projects for nuclear, manufacturing, and military clients worldwide.

ABOUT TRINITY TECHNOLOGIES: Trinity Technologies, based in Wellesley, MA, has a reputation as a leading business process and systems integration consulting firm for the energy and process industries. Established in 1995, the company has distinguished itself in delivering plant lifecycle information services, including systems integration, work process consulting, and organizational change services to help companies better manage their Information Assets®.

TRINITYCSA PRODUCTS & SERVICES:

1. Data migration services from legacy CAD, mechanical systems, instrumentation, and design systems using the Information Asset® Engine
2. Creating plant and corporate Information Assets® and aligning work processes
3. Documentum configuration and migration services and software for enhancing Documentum
4. Operating plant configuration capture through laser scanning technologies
5. Creation of integrated databases of facilities that are used to support lifecycle applications
6. Construction management using plant 4D, XD technology
7. Large scale plant configuration management
8. Business process and visioning services
